

ProPay JAK™

Simple, Secure and Affordable Credit Card Processing for Your Apple[®] iOS or Android™ Device

With ProPay JAK, you can securely process credit and debit cards in real-time on your Apple iOS or Android phone or device. If you have a ProPay Account, all you have to do is download the ProPay Application, attach the reader, and go!

Now, you can process credit and debit cards anytime, anywhere you have data coverage. And ProPay JAK is secure. Your customer's payment card data is encrypted on its reader head (at swipe) ensuring your customer's data is protected.

With the ProPay JAK, you can...

- Process credit and debit cards in real time on your Smartphone wherever you have data coverage.
- Store the card data securely (encrypted) on your device for later processing if you don't have data coverage.
- Put the card data securely "On File" with ProPay's ProtectPay[®] for future billing.
- Capture the customer's signature at the point of sale.
- Send an e-mail receipt to the cardholder.

ProPay JAK - Simple, Secure, Affordable and Very Cool!

Simple

- Download the ProPay Application
- Plug the JAK into the audio jack of your device.
- Open the Application and enter your PIN.
- Swipe your customer's card.
- Enter the purchase total.
- Have the customer sign and enter his or her e-mail address.
- Process the transaction and send the customer an e-mail receipt.

Secure

- Process with peace of mind, knowing the JAK encrypts cardholder data at swipe, ensuring the data is better protected.
- Store encrypted transactions on the phone for later processing if coverage is not available.
- Put cardholder data "on file" with ProPay's ProtectPay for future billing.
- Access and bill customer's cards stored with ProPay.

Affordable

- The ProPay Mobile Application is FREE.
- Enjoy lower transaction rates on real-time-card present transactions (where qualified).
- No fees to integrate JAK with your existing ProPay Account.
- No fee to access your online reports.
- No PCI-DSS Fee.
- No monthly account fees or monthly minimums.

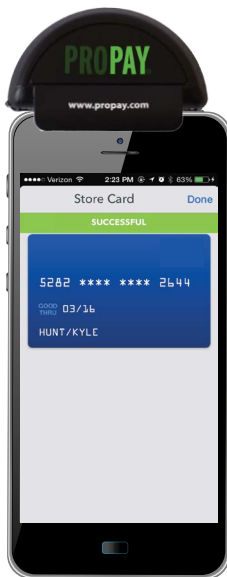

Summary of Key Features

Real-Time Authorizations

Complete transactions anywhere data coverage is available.

Suspended Payments

Store encrypted transactions when you don't have coverage and process them later.

Email Receipt

Send an e-mail receipt to your customers.

Capture Customer's Signature

Capture the customer's signature at the point of sale.

Store Customer Payment Information Securely

Place the card data securely "On File" with ProPay's ProtectPay® for future billing.

Account Functions

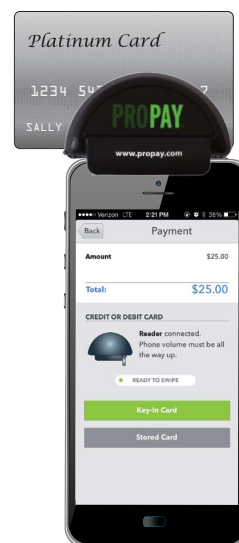

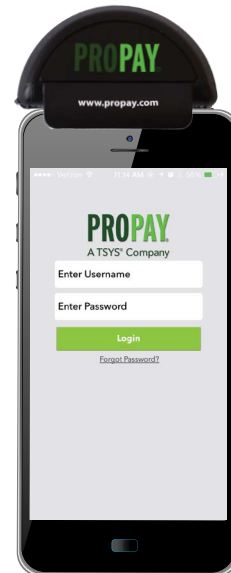

Check your ProPay Account information.

Security

Encrypt the magstripe data at swipe ensuring sensitive payment data is better protected from malware that may find its way on your phone.

Smart Toggle Mode

Toggle between real-time processing and store-for-later (suspended) processing.

Dependable Reads

Enjoy superior reading performance with JAK's bi-direction read head.

Convenient Attachments

Secure the reader to your device, so it doesn't spin around and risk damage to your audio jack.
