

ProPay Payment Facilitation

Provide a faster,
simplified customer
experience

The payment needs of software platforms are becoming more complex. To keep up with the ever-changing demands, you need to offer more. More choices. More flexibility. More simplicity.

Our ProPay Payment Facilitation Programs allow you to provide customized payment solutions tailored to the needs of your software. By offering robust options that bundle payments with point of sale, a simplified boarding process and an enhanced user experience, you can meet customer expectations – all while earning more revenue.

When you partner with TSYS, we'll handle the complexity of payments and help give you a competitive advantage. We can manage everything from risk and compliance to underwriting and regulatory issues. You're free to focus on providing simplified solutions without the burden and expense of becoming a registered payment facilitator.

TSYS[®]

Here's what TSYS can do for you:

More rewards, less risk

Let us handle the details, from processing and directing payments to managing risk. Our programs allow you to have most of the benefits of payment facilitation without taking on the work and burden yourself. We work with you to create customized offers for your business – all under our ProPay payment facilitation registration.

Easy, streamlined onboarding

Establish new accounts faster and with less paperwork. Your customers can onboard immediately upon completion of the short-form merchant application. This lets you compete directly with offers that include instant processing while offering full, feature-rich solutions.

Customer service your way

Choose to take calls from customers yourself or leave it up to TSYS. We're here to help with customer concerns, including chargebacks and settlements.

Generate revenue effortlessly

Our programs include revenue sharing to provide you with an easy way to grow your business.

Simplified billing and reporting

TSYS can collect fees and our sponsor bank can direct payments. We'll also provide a monthly summary of transactional data that includes debits, credits, chargebacks and transferred funds.

Flexible funding

Set disbursements to automatically deliver from each day's card activity or use APIs for more flexibility over the funding process. We can adapt to the way you want to do business.

Future-focused options

We also offer wholesale payment facilitation on our platform. This program makes it easy to transition from a retail facilitation program to becoming a registered payment facilitator yourself – with no impact to your customers.

Value-added service

Using our split-payments feature, software and SaaS providers can collect fees due at the time of transaction. Our disbursement capabilities also make it easy to pay commissions to third parties.
