

Customer card data safeguards powered by ControlScan[®]

ControlScan[®] assists you in understanding, validating and maintaining PCI DSS compliance

The ProPay/ControlScan Solution to PCI Compliance

As a valued ProPay customer and a merchant accepting credit/debit cards for payment, you are required to become compliant with the Payment Card Industry Data Security Standards (PCI DSS). The PCI DSS details security requirements for members, merchants and service providers that store, process or transmit cardholder data. This means that the processes and applications by which your business processes and handles credit and debit card data must abide by the standards set forth by the PCI Security Standards Council. These standards were established by the major credit card associations. To demonstrate compliance with the PCI DSS, merchants are required to submit an attestation of compliance annually.

ProPay has partnered with ControlScan to assist you in understanding and meeting the requirements needed to validate and maintain PCI compliance. ControlScan's easy-to-use solution and detailed level of support make achieving compliance less complicated. ControlScan's PCI 1-2-3 compliance program will provide you with access to:

- ControlScan's PCI 1-2-3 Self-Assessment Questionnaire
- ControlScan's PCI 1-2-3 Policy Builder
- ControlScan's PCI 1-2-3 Security Awareness Training
- ControlScan's PCI 1-2-3 Scanning (if applicable)
- Knowledgeable support staff

It is YOUR responsibility, as a merchant accepting credit and debit card payments, to safeguard customer card data by becoming PCI compliant. Again, in order to comply with the card brands and avoid potentially hefty fines, ProPay is requiring that all merchants meet PCI DSS requirements as soon as possible.

For more information about your PCI compliance program, visit www.controlscan.com/ProPay.
