

ProPay MasterMobileSM

Your Independent Sales Representatives will Love the Convenience of Swiping Credit Cards and You'll Love the Security and Cost Savings!

Make it Easy for Your Independent Sales Representatives to Securely Accept Credit Cards and Save Yourself Plenty in Processing Fees with ProPay[®] Secure, Payment Processing.

If your company sells its products and services through a mobile Independent Sales Representative, why not turn their processing from high-cost keyed transactions to low-cost swiped transactions?

Controlled Processing

Your Sales Representatives can now securely upload credit card transactions to your corporate merchant account. The benefit—you'll save money and they will save time. With ProPay JAK[™] there's no writing card numbers down (and no calling customers back on unreadable or incorrect information).

ProPay JAK

The ProPay JAK fits into the audio jack of any iPhone and many Android[™] devices. Of course, data is encrypted at swipe so that sensitive information never passes through your systems or the Sales Representative's device; keeping you safe from data theft and compromise. Swiping the card also qualifies the transaction for Card Present Rates, which can be significantly lower than Card Not Present Rates.

Online Order Processing

When your sale representatives are ready to place their orders on your company's website, they can upload their customer payment information and match the orders with the payments. ProPay encrypts and stores the credit card information so only tokens are passed to your system using ProtectPay, ProPay's secure end-to-end encryption and tokenization service.

Commission Payments

With ProPay Commission Payments, companies can pay earned commissions to a ProPay Payments Account. This method allows companies to recognize a significant savings over traditional, direct deposit or check-based commission payment systems. The funds can be accessed by consultants or sales agents through a company-branded Linked Prepaid MasterCard® card. This convenient, cost-effective approach allows companies to quickly pay Sales Representatives and allows them quick access to their funds.

SplitPay

When customers purchase online at a Sales Representative's website, ProPay can split the transaction proceeds between the Sales Representative and your organization. You receive the wholesale amount so you can fulfill the order and Distributors receive the retail differential into their ProPay account.

SpendBack

ProPay SpendBack lets Sales Representatives pay for wholesale orders directly from their ProPay account at significant savings to you.

Why You'll Love ProPay	Why Your Sales Reps Will Love ProPay
<p>Security - By using ProPay JAK™, the credit card data is encrypted at swipe ensuring the customer's payment data is secure—no need to write down credit card information where it can be lost or stolen.</p> <p>Lower Transaction Costs - When your Sales Representatives use ProPay JAK you get better "Card Present" rates which can greatly lower your costs.</p> <p>Efficiency - Using ProPay JAK reduces the potential for errors in writing down or keying in payment data which causes delays in order processing and payment.</p> <p>Integration - ProPay Services can easily integrate into your current order entry system. It won't disrupt the current user experience and can expedite payment to them which will help you to retain them.</p>	<p>Professionalism - Using ProPay JAK, your Sales Representatives will appear more professional. They no longer need to write down credit card information or key in payment information.</p> <p>Ease and Efficiency - Your Sales Representatives will save time and money because they no longer have to write down payment information or re-key the data.</p> <p>Real-Time Authorization - Your Sales Representatives will benefit from getting real-time payment authorizations.</p>

About ProPay

Since 1997, ProPay has provided simple, secure, and affordable payment solutions for organizations ranging from the small, home-based entrepreneur to multi-billion-dollar enterprises. ProPay is a leading provider of complete End-to-End Payment Security solutions that reduce, and may even eliminate, the organization's risk of having sensitive payment data compromised. ProPay is the recipient of the prestigious 2010 ETA ISO of the Year award.
